PROFESSIONAL SUMMARY

Senior Flutter Developer with 3.5+ years of experience in architecting, building, and shipping production-grade cross-platform applications across CRM, healthcare, fintech, and EdTech domains. Proven ownership of the complete product lifecycle — from requirement analysis and architecture design to App Store and Play Store release management. Deep expertise in native platform integration via Platform Channels (Twilio Voice VoIP, CallKit, PushKit, IoT/BLE health devices), ERP integrations (Odoo JSON RPC/XMLRPC), and clean, scalable MVVM architecture with BLoC, Provider, and GetX. Recognized for solving hard production issues (native crashes, performance bottlenecks, release mode failures), mentoring developers, and publishing open-source packages on pub.dev.

CORE SKILLS

- **Languages & Frameworks:** Dart, Flutter (Android, iOS, Web)
- **State Management:** BLoC, Provider, GetX, Riverpod.
- **Architecture:** MVVM, Clean Architecture, Modular Codebase, Responsive Design, Offline-First Patterns
- **API Integration:** RESTful APIs, JSON-RPC, XML-RPC (Odoo ERP), WebSocket, Dio, HTTP, Postman, Token-Based Authentication
- **Firebase:** Authentication, Cloud Messaging (FCM), Firestore, Realtime Database, Crashlytics
- **Native Integration:** Platform Channels, Method Channels, Twilio Voice SDK, CallKit, PushKit, Isolates, IoT/BLE Device Integration
- **Tools:** Android Studio, Xcode, VS Code, Git, GitHub, Firebase Console, Google Maps, Flutter DevTools, Shorebird Code Push
- **Deployment & DevOps:** Google Play Store, Apple App Store, App Store Connect, TestFlight, Code Signing, ProGuard/R8, Build Flavors, OTA Updates

PROFESSIONAL EXPERIENCE

Senior Flutter Developer

Pragmatic Techsoft Pvt. Ltd. (Pragtech) | Jun 2026 – Present

- Leading end-to-end development of Chivalry CRM, a cross-platform Odoo CRM product (Android/iOS) with lead and sales pipeline management, quotations, chatter, and WhatsApp messaging — owning architecture, native integration, and store releases single-handedly.
- Architected in-app VoIP calling by integrating the Twilio Voice SDK natively on both platforms via Platform Channels — outbound dialer, incoming calls with CallKit (iOS) and full-screen call notifications (Android), and real-time agent availability synced with the server.
- Designed a secure Odoo 18 integration layer using JSON-RPC/XML-RPC with session-based authentication and per-user API key management.
- Engineered push-driven incoming call delivery using FCM (Android) and APNs/PushKit (iOS), ensuring reliable call alerts even when the app is terminated.
- Own complete release engineering for the company: Android keystore signing, ProGuard/R8 configuration, App Store Connect setup (screenshots, App Privacy, age rating, TestFlight), and production submissions to both stores.
- Diagnosed and resolved a critical release-only native crash (R8 code shrinking stripping Twilio JNI symbols) through logcat/tombstone analysis and custom ProGuard keep rules — unblocking the production launch.
- Published and maintain `json_form_engine`, an open-source JSON-driven dynamic form builder on pub.dev with built-in image, camera, and file pickers, adopted across internal projects.
- Delivering a portfolio of Odoo-integrated apps in parallel: a delivery driver application and SocietyDesk, a dual-portal apartment maintenance product built on Odoo Helpdesk.

Senior Flutter Developer

Vardhan SK Health Care Pvt. Ltd. (Vizzhy Inc) | Nov 2025 – May 2026

- Owned end-to-end development of the Vizzhy health and wellness platform — UI implementation, API integration, native device connectivity, and releases to both stores.
- Integrated IoT-based health devices (glucose monitor, BP monitor, weight scale) with the Flutter app, enabling continuous metabolic health tracking.
- Engineered real-time health data streaming with the Azure SDK through Method Channels, ensuring secure, low-latency native-to-Flutter data flow.
- Established multi-environment build infrastructure (Dev, Staging, Production) with flavor-based configuration, signing, and provisioning — standardizing the team's release process.
- Introduced Shorebird Code Push for over-the-air updates, cutting bug-fix turnaround from store-review days to minutes.
- Drove performance optimization across API handling, widget rebuilds, and memory usage, measurably improving app responsiveness and stability.
- Partnered with backend and IoT teams to guarantee secure, accurate synchronization of sensitive health data.

Flutter Developer

LOGIMONK Technologies | Nov 2022 – Aug 2025

- Delivered and maintained multiple production apps across mobile and web using Flutter and Dart — OctaveHI (fintech), Aspirant League (EdTech), and PIMS HQ (enterprise web).
- Owned features end-to-end: UI implementation, API integration, testing, and deployment to Google Play Store and Apple App Store.
- Championed MVVM architecture and clean code principles across projects, improving scalability, maintainability, and testability of shared codebases.
- Integrated Firebase Authentication, Firestore, Cloud Messaging, and Realtime Database for real-time communication and secure data management.
- Built a library of custom reusable widgets that standardized UI/UX across screens and accelerated feature delivery for the whole team.
- Optimized REST API consumption with robust error handling, token-based authentication, and efficient data flow, reducing redundant network calls.
- Mentored junior developers through structured code reviews, Flutter best-practice guidance, and hands-on debugging support.
- Led performance analysis efforts — profiling frame rates, load times, and memory — and drove fixes to keep apps at 60fps.
- Managed build signing, environment flavors, and platform-specific store requirements across the full release cycle.

KEY PROJECTS

Chivalry CRM (Flutter – Android/iOS) — Odoo CRM with VoIP Calling

- Sales CRM integrated with Odoo 18: stage-filtered lead pipeline, quotations, chatter, WhatsApp messaging, and one-tap Twilio VoIP calling with a fully native incoming-call experience on both platforms.

Vizzhy (Flutter – Android/iOS) - Health Care App

- Digital health platform for metabolic health monitoring powered by connected IoT devices (glucose, blood pressure, and weight monitors) with real-time data streaming.

Octave Holding and Investment (Flutter – Android/iOS)

- Investment platform with dual user portals (Investor and Advisor), secure API authentication, FCM push alerts, and dynamic graph visualizations for real-time portfolio performance and analytics.

Fast Peer AI (Flutter – Android/iOS)

- Voice AI chatbot combining OpenAI API, D-ID avatar videos, and text-to-speech pipelines, optimized for smooth cross-platform performance.

PIMS HQ (Flutter Web Application)

- Dashboards, invoicing, and real-time data modules with dynamic API rendering, clean architecture, and fully responsive web layouts.
-

Aspirant League – EdTech App

- WebSocket-based real-time gameplay, exam engine, and analytics dashboards for competitive exam preparation.
- **json_form_engine — Open-Source Flutter Package (pub.dev)**
- JSON-driven dynamic form builder with built-in image, camera, and file pickers; published and actively maintained on pub.dev.

EDUCATION

Bachelor of Engineering (Electronics & Communication Engineering)

Rajiv Gandhi Proudlyogiki Vishwavidyalaya (RGPV), Bhopal | 2020 | CGPA: 7.6

Higher Secondary (12th) — MP Board of Secondary Education, Bhopal | 2016 | 88%

Secondary (10th) — MP Board of Secondary Education, Bhopal | 2014 | 82%
